

Petra Diesel Fuel/EGR Services Machine

PN S-DFS-910 Specification Sheet

Equipment Description

The Petra S-DFS 910 is designed to clean the fuel system on diesel engines without mechanical strip-down of the injectors or the pump. Performing a diesel fuel system service is easier than ever. A cleaning fluid is circulated through the fuel system while the vehicle is running. This isolates the injector pump, lines and injectors, allowing the cleaning fuel to remove varnish, gum, carbon & other contaminants from the complete fuel system and combustion chamber. This service will restore the vehicle's performance, fuel economy and reduce harmful exhaust emissions.

Features:

- Versatile - connects to all diesel systems
- No spill or mixing system
- Easy to use
- Quick hook up
- Hoses with quick couplers and fittings
- Comprehensive adapter kit
- 12 volt D.C. and shop air
- 2 fluid tanks
- No need to replace or remove DPS filter
- Pressure regulator
- Compact design
- Helps clean injector combustion chamber & EGR
